paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 241 Publisher: Zhengzhou University. Pub. Date :2008-09-01 2008-09-01 1st edition 1st printing. This book is based on the requirements of pharmaceutical chemistry curriculum written. the intention is experiments to enhance understanding of medicinal chemistry and basic knowledge of the basic theory. control of drug synthesis and structural modification of the basic method. familiar with the design and experimental program selection of experimental conditions to understand the principle and put together new technologies and new methods of modern medicinal chemistry experiments in the application of . to further standardize and consolidate the operation of experiments in organic chemistry techniques and the theory of knowledge. students integrate theory with practice. seeking truth from facts. scrupulous scientific approach. to improve its analysis and to solve practical problems. Contents: first the basic knowledge of medicinal chemistry experiment one lab safety and accident prevention and treatment of two drugs commonly used in chemical laboratory glassware. equipment and devices III installation requires four instruments. glassware washing five experiments pharmaceutical preparation. access to and weighed six organic compounds separation and purification technology seven test...

Reviews

Very good eBook and valuable one. This is for anyone who statte that there was not a worth reading. You will not truly feel monotony at at any time of your own time (that's what catalogs are for concerning if you question me).

-- Ms. Ona Muller

An extremely awesome pdf with perfect and lucid reasons. I have got go through and so i am certain that i will going to read again once again in the foreseeable future. I found out this ebook from my dad and i recommended this publication to understand.
