Excerpt: .precipitation, thunder and lightning, optical phenomena, etc., are recorded, so far as possible, and the degree of visibility of mountains to the westward is observed twice a day. Continuous automatic records are maintained of the following elements: atmospheric pressure (on daily, weekly, and monthly sheets), air-temperature and relative humidity, winddirection and velocity (distance travelled and rate), precipitation, bright sunshine (daily and weekly records), and cloudiness at night in the vicinity of the pole star. The two secondary stations are situated below the Observatory and north-northwest of it: one at the base of Great Blue Hill, at the residence of Mr. Clayton; and the other, which is managed by Mrs. H. M. Dean, in the Neponset Valley. In May, 1902, the latter station was removed from the land of the Metropolitan Park, on the bank of the Neponset River, to a new site, about a...
