Symbolic and Algebraic Computation

By E. W. Ng

Springer Jun 1979, 1979. Taschenbuch. Book Condition: Neu. 235x155x30 mm. This item is printed on demand - Print on Demand Titel. Neuware - A criterion for detecting unnecessary reductions in the construction of Gröbner-bases.- Unification of commutative terms.- Canonicality in rule systems.- The application of symbolic algebra to physics A case of creeping flow.- Progress towards a solution of the equivalence problem in general relativity.- Symbol calculus by symbolic computation and semi-classical expansions.- An algorithm for the analytic evaluation of a class of integrals.- Fast computation of the rational hermite interpolant and solving toeplitz systems of equations via the extended Euclidean algorithm.- Approximate algorithms to derive exact solutions to systems of linear equations.- New recursive minor expansion algorithms, a presentation in a comparative context.- Systems of algebraic equations.- On the van der waerden criterion for the group of an equation.- Some computations related to torsion points on elliptic curves over number fields.- The computerisation of algebraic geometry.- Algebraic extensions of arbitrary integral domains.- On unit computation in real quadratic fields.- An algebraic form of a solution of a system of linear differential equations with constant coefficients.- Substitution methods for the automatic symbolic solution of differential equations of first order and...

Reviews

This pdf can be worthy of a read, and much better than other. I am quite late in start reading this one, but better then never. Its been printed in an remarkably easy way which is merely following i finished reading this book by which basically changed me, alter the way i think.
-- Nedra Kiehn

Completely essential read through publication. It normally does not expense excessive. It is extremely difficult to leave it before concluding, once you begin to read the book.
-- Morris Cruickshank
